

Explanation of Exhibit C_e_g_3

C.3.g.3. Maintain clinical expertise

All GC SON faculty are experts in their respective specialty areas of practice. Twelve full-time faculty members are advanced practice nurses (one is an Adult Nurse Practitioner, seven are Family Nurse Practitioner, three are Psychiatric Mental Health Nurse Practitioners, one is Pediatric Nurse Practitioner and three are Certified Nurse Midwives). Some of these same faculty hold multiple certifications for example FNP and PNP or PMHNP and CNS. The FNP, PMHNP, and WHNP Program Coordinators are all certified in their specialty and population-focused areas of practice as specified by the relevant regulatory and specialty bodies. All APRN faculty maintain current national certification and hold Georgia State advanced practice licensure.

The GC SON provides flexibility in scheduling to foster clinical practice. The University does not have a faculty practice plan, however, each faculty member is allowed one eight hour day per week to maintain a clinical practice. GC provides support for faculty members to maintain currency in practice by supporting the time required by the faculty member to obtain and maintain national certification. Faculty practice sites range from private practice, academic health centers, volunteer clinics, and acute care inpatient facilities.

Exhibits:

1. Examples of approved Consulting Forms
2. Work load Policy/Procedure Draft
3. USG Work Load Survey
4. CoHS Goals for 2019-2020 in terms of Workload
